

# ATC Varma Infrared Heaters

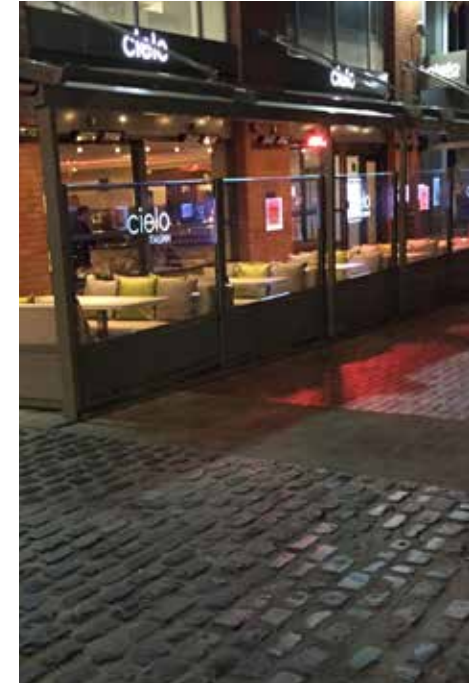

Waterproof IP65  
**‘Feel the Heat’**

SUITABLE FOR EXTERNAL OR INDOOR APPLICATIONS.

**The ATC Varma Infrared Heaters IPX5** are suitable for total or supplementary heating in premises or zones. They are wall mounted and are available in 3 options. As they are IPX5 protected they can be exposed to the weather but can also be used indoors as well.

### Product Features

- 2KW and 4KW models available
- Energy efficient low energy costs
- Draught and Noise free
- Aluminium reflectors for optimal heat output
- Can be angled in different positions
- Robust industrial design
- Heaters can be controlled with appropriate controller
- IPX5 Protection
- Recommended mounting height 2.8m
- CE Compliant

### Technical Specifications

Code	Heat Output(W)	Voltage (V)	Hz	Amps (A)	LxHxW (mm)	Weight (kg)	IP Rating
V400/20X5	2000	230	50	8.7	400 x 220 x 120	3.6	IPX5
V400/2-40X5	4000	230	50	17.4	800 x 220 x 120	5.0	IPX5
V400/2V-40X5F (2 x 2000)	4000	230	50	17.4	400 x 350 x 130	5.0	IPX5

### Design Facility

We are committed to providing comprehensive technical support for all general heating projects. We are now in a position to offer the most comprehensive design service yet. Simple sketches and dimensions can be converted into a professional drawing plan and quotation. All plans can be electronically sent and received for maximum efficiency e-mail: [sales@atc.ie](mailto:sales@atc.ie)
